

# INSURE OUR SURVIVAL

It's time for the  
**insurance industry to stop**  
insuring our destruction and  
dump the fossil fuel crooks  
setting our world on fire!

## **WHY ARE WE HERE?**

**We're an Extinction Rebellion campaign called Insure Our Survival that is part of a major global movement demanding that insurers stop insuring the oil, gas and oil projects that are causing the climate crisis.**

**No insurance means that the fossil fuel criminals flooding our homes, wrecking our food supplies, and threatening to kill billions won't be able to afford the huge financial risks that come with digging and drilling for their planet-wrecking products. And they'll have to stop.**

**So, the insurance industry has a superpower: to stop oil, gas and coal bosses making the climate emergency even worse. We're demanding that insurers use that superpower. We've already convinced giant insurers Zurich to say no to new fossil fuels. We'll keep protesting the other insurance businesses until they do the same.**

## **WHAT CAN YOU DO?**

**Find out about the insurance industry's deadly links to fossil fuel criminals here:**

**Get news from the Insure Our Survival campaign and discover other ways to get involved with Extinction Rebellion:**
