Media

The world’s media system; social media, corporate media and state media, **has been hijacked by a handful of powerful interests** – billionaire-owners, political operators and advertisers.

Abusing this power, they push narrow, toxic agendas at the expense of truth and public interest – eroding democracy and destroying life in their path.

XR's first demand is 'Tell The Truth' and this connects directly to the work of a group called 'Media Revolution' that XRUK have connected to. They have a strategy, a plan, action packs and resources to counter the mainstream media power.
