**current favourites,
NONVIOLENCE is long,
so amazing on arms**

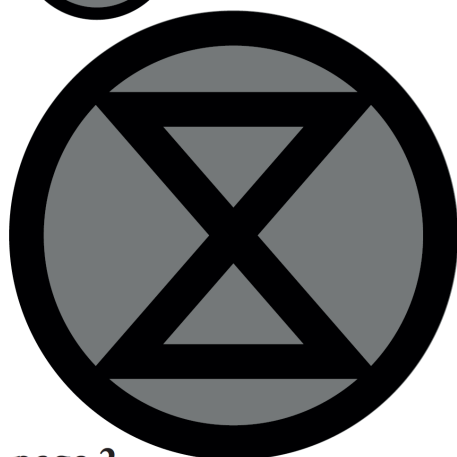

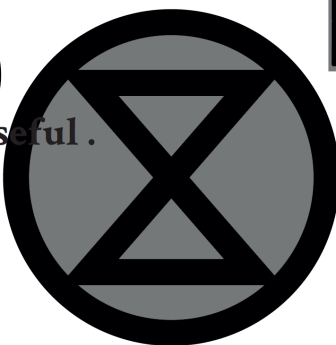

**everything in this doc
is to scale, and back to
front.**

page 1

April 2019 blocks,
 NON VIOLENT was
 not that popular
 hhh
 hhhbut it is useful .

page 4

October 2019 blocks, CHANGE IS NOW is kinda weird, not really successful due to being rushed, I find the HUMILITY etc,, a bit small, my handcut ones are 50mm high.

WE'RE

page 5

kinda into these atm, DEAD is good either size, the NO YOU can be printed instead of NO MUSIC, so you print NO YOU ON A DEAD PLANET

page 6

giant blocks, with the 3D printed blocks limited to around 200mm I felt that everything was the same size, so lets break it and make them too big, they are great!!

page 7

big words, these are same size as REBEL and DISOBEY, and soooo good, esp
TENDER and KINDNESS

TRUTH

EMPATHY
KINDNESS
COURAGE
TENDER

page 8

bee flag block

page 9

FUCK YOUR FUCKING EGO designed by marty, love it molecule from XR SCIENTISTS but great fun for all, the youth strike lot have a lot of confusing graphics so I extracted these, print the horizontal bars in black and the lightening in green, I kinda like the lightening on its own to. The ! is stolen from Paris 68 Redux, just a visual element.

page 10

first vertical block : REBEL FOR LIFE
(for all species life rebel), second vertical block :
SWEET LOVING ANARCHY
(no government free love),
top right : ECOLOGICAL CRISIS
(life/eco system danger moment).
bottom right : EXTINCTION
REBELLION
(rebel/against dead totally none)

these are simplified vectors that Flavia has cut for me, I tried to make them strong and simple

page 12

these are the vectors that Amy at Artisan Modelmakers uses to make great image blocks, the blocks are very detailed and a little fragile, but this can be compensated by careful storage, sealing the blocks well and maybe a little araldite. They could be cut larger as well, that would help with strength and details getting clogged, I like really inking blocks heavily, thats my thing.

page 13

These are simplified versions of the Butterfly, swallow and Octopus, designed for lazer cut or smaller graphics, Im confident they will be great but I have not had these made yet. If you want different sizes then talk to your lazer cutter. I like to print with a lot of ink, so I like things strong and clear. Off course the best thing is cut by hand, and dont follow these designs, have a good think , discuss subject with your friends and then go for it !!!

page 15

hearts are great, I have a whole range, smaller and larger than these. I just cut these out of ply using jigsaw and knives.

These are simplified versions of the SPROUT, designed for Lazer cut or to have a small vector images for badges and patches, these have been made but not printed yet, but they look sweet.
