Zines

Zines are little pamplets filled with information. As a format they have a rich history in activism and the use of printed media like this opens our resources up to a much wider audience in a really fun and accessible way!

Consider where you could put a zine like this:

- Maybe pin one to your local notice board?
- Does your library or cafe have a table of leaflets you can add them to?
- Are there any community organisations in your area you could share them with?
- Keep some in your bag as a gift for anyone you start an interesting conversation with.

To fold the zine formats check out this guide.

2026 Zines!

XR Zines!

We fully believe in a culture of play, experimentation and joyous mistake making. Our Zines will forever be imperfect and scrappy, this is an intentional mirroring of Community Building.

With new information, learnings, a changing world, and different perspectives as our team grows, we will continue to update our Zines to reflect our forever growing understanding of this work.

Community Building will never be clean and perfect - it is about trying things, learning, and trying again!

Worksheets

These can be printed for use in workshops to explore some of the tools in a more focused way. They can be used one at a time or together as a complete set. As always, take what works and leave the rest. We'd love to hear how you get on!
