

Positive Solutions Jigsaw Puzzle Pieces

Positive Solutions Fabric Jigsaw Puzzle Pieces (for wall hanging)

Much like a patchwork quilt, this collaborative piece involves individuals making puzzle shaped artwork, which is then brought together and displayed as a bigger display.

You could use a wide variety of crafts to create your positive solution to the climate and ecological crisis. It can be something global, national or local.

You can print [this template](#) (it's A3 size so you may need to print over two A4 sheets and tape together) and cut your own material. It can be useful if someone can pre-cut some puzzle fabric and post out to those who don't have access to a printer.

If you're not sure how to print the template at home if you have an A4 printer, [follow these instructions](#)

IMPORTANT DIRECTION: All puzzle pieces must face the same way when completed so they can fit together as a giant wall hanging jigsaw.

When collecting puzzle pieces it could be useful to get name, age, location, contact details (MM, email) and a short blurb describing the design if you want to write a descriptor for the pieces when on display. Once all pieces are collected fit them together to create a large wall hanging/ banner. This can be displayed at actions, or in a local public place. It can be a good community engagement tool by inviting people in your local communities to add their own pieces.
