

Colours

We have a standard set of colours for our publications, which are documented [in the Design Programme](#).

As it is a large PDF, here is a summary of the colour scheme. This page also has the hex values of the colours. If you need CMYK or PMS codes, they are in the original document, which is also the place to go for the full guidance.

Main colours

When you see the logo it’s often black on green, but it can also sit on the other backgrounds.

Bright colours

Our colours symbolise the intersectional nature of XR. The colours can and should be mixed together to create bold and bright graphics.
