Digital Do-It-At-Home Actions

Digitally Rebel with Dirty Water

Let’s work together doing what we can, where we can, when we can, to put an end to the UK water pollution and corruption scandals.

Take part in Dirty Water Digital Do-It-At Home Actions on the Digital Rebellion website.

Google Review Swarm

Let’s come together to create a swarm of negative 1-star Google reviews for the head offices of our toxic water companies in the UK.

Take part in this action here.

The recent State of Our Rivers Report from the Rivers Trust shows that our rivers are in crisis and facing toxic cocktails of pollution. The Environment Agency reported sewage spills into England's rivers and seas by water companies more than doubled last year (from 1.75 million hours in 2022 to 3.6 million hours in 2023). In English rivers, storm overflows contributed to at least 11% of total ecological health standard failures.
