

Information Resources | Reports, Maps, Data & More

Maps

Please be aware that data catchment and sharing is still evolving. We have been made aware of specific sites, including some which have resulted in death, from contaminated flood water. If you are aware of sites which are missing from this data, please get in touch with us, so we can pass your story onto whomever is working on that issue.

- [Hansard: Waste Industry - Criminality & Regulation](#)
- [The National Archives](#) Official historic records not subject to secrecy 'D' Notices
- [House of Lords Library. Sewage Pollution in England's Waters](#)
- Remember too that sewage is only one among other contaminants that pose a risk to your family's health. Check this [government guidance on swimming outdoors](#). Beware, however, this says nothing of **chemical pollution**, which could be particularly risky if a [beach borders a historic landfill](#) or industrial sites.
- [Exposure and Adverse Effects of Chemicals on Wildlife in the Environment](#)

Organisations and Allies

We will be making a spreadsheet of possible contacts available to view, make a copy of and add your local contacts to, so they can be shared with rebels coming on board and stepping into Dirty Water actions, e.g. outreach events, ceremonies, or assembly organisation. More about this in

time, but meantime, here's the current state of play with our [Restore Nature Now supporters](#).

Aside from the Restore Nature Now supporting organisations, you will have your own local links, be they allies, or connections with regulatory bodies and their officers, water company employees and board members and more. We want you to bring us your contacts, to help the movement grow our

campaigning power for the future. Check in with the Dirty Water Campaign to find out more about building XR's connections with influencers from the grassroots to suited power brokers and corporate players.

Celebrity Connections. Who Are You Following and Engaging With?
