

Top Tips and Updates

A page to help our work as editors of the Rebel Toolkit, with some top tips that have come to light to help save us time by avoiding common issues. Also if any major changes related to software or changes in advice for editors will be posted here.

Top Tips

No1.

When you edit it page, please always 'save' afterwards, even if you don't make an edit - otherwise it creates a draft and this can get messy when multiple people are editing a page.

No2.

Try to edit a page all in one go - this really helps the proofreaders in the Rebel Toolkit team as they can see all the changes in one go.
