

Our Demands

We have three demands of the Government and others in positions of power:

1. Tell the Truth

All institutions must communicate the danger we are in. We must be clear about the extreme cascading risks humanity now faces, the injustice this represents, its historic roots, and the urgent need for rapid political, social and economic change.

2. Act Now

Every part of society must act now to reduce greenhouse gas emissions to net zero by 2025* and begin protecting and repairing nature immediately. The whole of society must move into a new precautionary paradigm, where life is sacred and all are in service to ensuring its future.

3. Decide Together

We demand a culture of participation, fairness and transparency. The Government must create and be led by a Citizens' Assembly on Climate and Ecological Justice. Only the common sense of ordinary people will help us navigate the challenging decisions ahead.

*When XR was launched in 2018, 2025 was a realistic date, seven years in the future, with time to do what was needed. We keep this target to show how much time has been lost.
