# Make your Group Visible

## Does the rest of the movement know your group exists?

### Local Group Map

It's *really* important your group is on the Local Group map with up-to-date contact details, as this way new joiners can find you, get in touch and join your email list.

This map can be found on the XRUK website and some nation/region websites too. The map is linked from the UK email list welcome emails and also used by the 'Rebel Ringers' to help connect people to your group.

To update any info on this map, contact map@extinctionrebellion.uk.

### Community Groups

If you're a community group (communities of shared self identity, rather than of shared location), make sure you're listed in the Community Group section on this page of the UK website, - contact communitygroups@extinctionrebellion.uk to add or update info about your group.

### Event Map

Get your meetings, actions, socials etc on to the Event Map - submit your event via the 'Request XRUK Support' form. This map is a popular link on the XRUK website and used by the 'Rebel Ringers' team to point new joiners to events in their area.

### Publicity

Share what you're up to! Join the Live Action Content chat on Telegram to share with the rest of the movement your best photos and videos.

### The Hub

XR Organism: ensuring your Group is on The Hub, and your contact information is up to date, makes it easier for other groups to find you. Contact your Gardener or Nation/Region team to update this.
