

General and Event Specific Flyers

Ready to print flyers for themes, actions and general climate and ecological messaging.

Please don't use the images on this page to print, make sure you download the print-quality version.

Rebel for Truth

These are the current generic outreach flyers. They are undated and so will be able to be used whenever you need them.

You can [order them to be delivered directly to your group here](#), or you can print your own by downloading them from [this link, including Welsh versions](#).

TOGETHER WE ARE POWERFUL

Our climate is deteriorating faster than predicted, and those in power are not listening to experts.

The Government, media and fossil fuel companies are all complicit in the lies that allow business as usual.

They profit while our bills rise, and want you to think they are doing enough while life on our planet dies.

Activists are jailed, rather than the villains who pump sewage into our seas and rivers and pollution into our air.

Extinction Rebellion wants power to be in the hands of the people. **We need to decide together.** That's why we demand a Citizens' Assembly on Climate and Ecological Justice.

If we are to have any hope of coping with the climate emergency, we have to move beyond the politics that have so far held us back, into dialogue and towards unity and action.

People power can change the course of history.

Conflict and Climate

Increasingly, groups are wanting to talk about the links between conflict and the climate crisis, but explaining these connections to people can be difficult. Our [War and Peace messaging guidance](#) has been designed to help with that.

If you are doing an XR action linked to current conflicts, or are running a stall at an event (a Palestine fundraiser, for example), you may wish to use these flyers to help explain why you are there, and why conflict and climate change are 2 sides of the same problem.

WHAT IS A CITIZENS' ASSEMBLY?

A citizens' assembly is a representative group of people tasked with solving a complicated issue, such as the climate and ecological crisis. They learn from a wide range of expert sources and each other, then agree on fair and long-term solutions.

WHY IS IT IMPORTANT?

Because our politicians are more focused on short-term goals and re-election, rather than our planet's future.

GLOBAL JUSTICE CAMPAIGN

Countries in the global south are some of the first to feel the effects of climate breakdown and often get blamed for the rise in temperatures.

Yet it is high income global north countries who produce the majority of the cumulative greenhouse gas emissions.

This follows a history of colonisation and global unrest. Climate change exacerbates existing inequalities such as food & water scarcity, poverty and access to housing. This in turn makes it harder for low income countries to prepare for climate breakdown.

Conflict and arms trades, which are sadly so prevalent in our world today, also exacerbate the effects of climate change. There is already data that suggests that the number of conflicts is rising, along with the global temperature increase.

This is a trend we are likely to see continue as the earth continues to heat, and the impacts of the climate emergency become more acute. Conflict over resources, destabilising regimes and natural disasters will all exacerbate the situation.
