

General and Event Specific Flyers

Ready to print flyers for themes, actions and general climate and ecological messaging.

Please don't use the images on this page to print, make sure you download the print-quality version.

Rebel for Truth

These are the current generic outreach flyers. They are undated and so will be able to be used whenever you need them.

You can [order them to be delivered directly to your group here](#), or you can print your own by downloading them from [this link, including Welsh versions](#).

TOGETHER WE ARE POWERFUL

Our climate is deteriorating faster than predicted, and those in power are not listening to experts.

The Government, media and fossil fuel companies are all complicit in the lies that allow business as usual.

They profit while our bills rise, and want you to think they are doing enough while life on our planet dies.

Activists are jailed, rather than the villains who pump sewage into our seas and rivers and pollution into our air.

Extinction Rebellion wants power to be in the hands of the people. **We need to decide together.** That's why we demand a Citizens' Assembly on Climate and Ecological Justice.

If we are to have any hope of coping with the climate emergency, we have to move beyond the politics that have so far held us back, into dialogue and towards unity and action.

People power can change the course of history.

Conflict and Climate

Increasingly, groups are wanting to talk about the links between conflict and the climate crisis, but explaining these connections to people can be difficult. Our [War and Peace messaging guidance](#) has been designed to help with that.

If you are doing an XR action linked to current conflicts, or are running a stall at an event (a Palestine fundraiser, for example), you may wish to use these flyers to help explain why you are there, and why conflict and climate change are 2 sides of the same problem.

WHAT HAS CONFLICT GOT TO DO WITH THE CLIMATE AND ECOLOGICAL EMERGENCY?

extinction rebellion

“THE THREATS OF OUR MODERN WORLD, MADE WORSE BY RISING SEAS, EXTREME WEATHER AND CREEPING DESERTIFICATION, WILL ALMOST CERTAINLY LEAD TO MORE CONFLICT. MORE CONFLICT IN ITSELF WILL DAMAGE THE PLANET”

— **MINISTRY OF DEFENCE**

There is a strong link between the climate and ecological emergency (CEE) and conflict, but it is not a simple or linear one and so it is not one that people can always automatically connect to.

Of the 25 most climate-vulnerable nations, over half are already in conflict. A 2019 study found climate change contributed to between 3% to 20% of conflicts over the last century with the potential influence set to increase substantially due to warming global temperatures.

Both the CEE and conflict are rooted in oppression, both historic and current, and perpetuated by institutions and corporations entwined in a web of exploitation that profits from injustice. Unifying factors - such as exploitation, colonialism, racism and poverty bind these issues together, as those on the frontlines of the climate and ecological emergency are also likely to be suffering from violence and oppression.

As the climate emergency escalates, so will the number of conflicts.

Promote Citizens' Assemblies

[Download this flyer to promote Citizens' Assemblies here.](#)

WHAT IS A CITIZENS' ASSEMBLY?

A citizens' assembly is a representative group of people tasked with solving a complicated issue, such as the climate and ecological crisis. They learn from a wide range of expert sources and each other, then agree on fair and long-term solutions.

WHY IS IT IMPORTANT?

Because our politicians are more focused on short-term goals and re-election, rather than our planet's future.

GLOBAL JUSTICE CAMPAIGN

Countries in the global south are some of the first to feel the effects of climate breakdown and often get blamed for the rise in temperatures.

Yet it is high income global north countries who produce the majority of the cumulative greenhouse gas emissions.

This follows a history of colonisation and global unrest. Climate change exacerbates existing inequalities such as food & water scarcity, poverty and access to housing. This in turn makes it harder for low income countries to prepare for climate breakdown.

Conflict and arms trades, which are sadly so prevalent in our world today, also exacerbate the effects of climate change. There is already data that suggests that the number of conflicts is rising, along with the global temperature increase.

This is a trend we are likely to see continue as the earth continues to heat, and the impacts of the climate emergency become more acute. Conflict over resources, destabilising regimes and natural disasters will all exacerbate the situation.

Social Justice = Climate Justice

Find the Social Justice flyers here

The image shows two flyers from Extinction Rebellion. The left flyer is pink and features the text "Climate Justice = Social Justice" in large, bold, black letters. Below the text is a black silhouette of a hand holding a megaphone. The flyer is surrounded by a border of small, black, vertical text: "FLOODS", "GREENWASH", "DEBT", "BUSINESS AS USUAL", "DIVISION", "LOSING", "FOSSIL FUELS", "LIES", "REGIME", "THINK TANKS", "GREED", "INDUSTRIAL", "INJUSTICE", "FIRES", "DEATH", "CARBON BUBBLES", "TOXIC AIR", "INEQUALITY", "RACISM", "4 DEGREES WARMING". At the top and bottom are the Extinction Rebellion logo and the website "extinctionrebellion.uk". The right flyer is also pink and titled "SOCIAL JUSTICE CAMPAIGN" in large, bold, black letters. Below the title is a paragraph of text: "Marginalised groups and people already struggling with poverty and inequality will be the first to feel the effects of the climate and ecological emergency." This is followed by another paragraph: "The climate crisis is at least in part due to the current and historic oppression and exploitation of those most impoverished and vulnerable in our communities and around the world." Then another paragraph: "As the effects of the climate and ecological emergency worsen, resources such as money, food, healthcare, housing and water will become scarce. This will affect everybody but non more so than vulnerable groups such as: Low-income countries & households, people of colour, indigenous people, women, trans people, young people and disabled people." This is followed by a paragraph: "It is important that we stand together in solidarity against all injustice if we hope to tackle this crisis." Below this is a call to action: "Join us! In the global fight for Social Justice and deliberative democracy." At the bottom left is the Extinction Rebellion logo and at the bottom right is a QR code.
