

# extinction rebellion

**The rich and powerful are boiling our planet and destroying our natural world for massive personal profit.**

**Our governments are being led by fossil fuel companies and the super rich.**

**They want us to blame each other. They reap the profits, and we feel the pain.**

**You are not alone. Acting together is the only way things have ever changed.**

**Groups across the UK (and the world) are organising within their communities to protect homes and livelihoods.**

**Community assemblies, protests, boycotts, sit-ins, demonstrations...**

**Join with others in your area to demand a safe future.**

Government must **Tell The Truth**  
Society must **Act Now**  
We can **Decide Together**

Just as fungi turn decay into new life,  
communities replace systems which no  
longer serve us with something better.
