

# Stencil designs

## Making your own stencils

We advise using old wallpaper for stencils. Just lay the printed sheets, in order where appropriate, over the wallpaper and cut through.

This can be done by hand with a craft knife or scalpel, or if available, could be done quickly and easily using a laser cutting machine.

## Stencil files to download

Here are a **collection of stencil files** adapted from the XR Artblockers woodblocks, Paris68 Redux and other rebel artists. Perfect for printing on t-shirts, banners or posters using a roller and acrylic paint - instructions on how to make them are included within.

## Extinction Symbol

**Various XR symbol files to download** from XR's cloud (if you have a Hub login) or a quick download of the **Extinction Symbol** (as seen below).
